AI-Assisted ESG & Supply Chain Analytics Framework

ESG Insights | AI-Driven Business Analysis

Sheetal Yeole

Problem

Organizations struggle to connect ESG metrics with supply chain performance, leading to inefficient decision-making and lack of sustainability visibility.

Approach

- Defined ESG + Supply Chain KPIs
- Built conceptual data model
- Identified supplier performance metrics
- Used AI to generate insights
- Structured business case

Insights

High CO2 emissions = longer delivery cycles

Supplier performance varies across regions

Cost vs sustainability trade-off exists

AI helps summarize KPI relationships

Business Impact

- Better supplier evaluation
- ESG visibility improvement
- Faster decision-making
- AI-assisted reporting
